Megha Gupta

Lead, Software Development at Global Relay
London, England, United Kingdom

Summary

Technically Sophisticated Professional with 15+ years of experience in the area of Software Development, IT and Implementation Programming. Adept in end-to-end development of software Products from Requirement Analysis to System Study, Designing, Coding, Testing, De-Bugging, Documentation, and Implementation. Proven problem solving and analytical thinking skills, a fast learning curve, and the ability to adapt to evolving industry trends. A Dedicated Professional with the drive and skill-set to excel in Project Executions and contributing to organizations' goal.

Experience

Global Relay
10 months

Lead, Software Development
October 2025 - Present (10 months)

Lead Software Engineer
October 2025 - Present (10 months)

Lead development of the File Share Service, the document-sharing capability inside the Global Relay messenger that lets users send and exchange files within compliant chat. Built the Apple Message Service, a solution that captures and archives Apple Messages to meet regulatory record-keeping and compliance requirements. Drive design and delivery across a high-throughput Java and Python platform serving regulated financial institutions.

Altus Group
6 years 5 months

Technical Lead
March 2020 - October 2025 (5 years 8 months)
London

Designed and delivered core platform services for a real-estate SaaS product: Stewardship (file import and validation), Core Service (user management),

MDM (address management) and PAMs (asset creation through rent-roll and lease management). Led a team of engineers and QAs building a full-stack SaaS product for real estate companies, acting as Scrum Master across all ceremonies. Defined the derived-domain schema powering the Voyanta and Power BI reporting dashboards. Set up services and CI/CD pipelines, and introduced Checkstyle and SonarQube to raise and enforce code quality. Mentored the team on best practices, kept libraries current, and spent roughly half of each week writing optimized business-logic code.

Sr. Software Engineer

June 2019 - March 2020 (10 months)

Senior Software Engineer

June 2019 - March 2020 (10 months)

Delivered a critical integration with legacy platforms using Scala and Spark on AWS Glue, improving data transaction performance by 60%. Built multiple microservices for internal and external product integration. Documented industry coding standards and introduced CI/CD pipelines with GitHub and Jenkins.

Genie AI

Senior Software Engineer

November 2018 - April 2019 (6 months)

London, United Kingdom

Developed serverless microservices in Node.js for AI-powered smart contracts and legal document templates. Defined company-wide coding standards and mentored developers on modern JavaScript, testing strategies, AWS Lambda and the Serverless framework.

Phenom People

1 year 1 month

Senior Software Developer/ Senior Product Analyst

September 2017 - September 2018 (1 year 1 month)

Hyderabad, Telangana, India

Senior Software Engineer

September 2017 - September 2018 (1 year 1 month)

Cut server costs by 40% by optimizing Kafka and Apache Storm deployments. Reduced file storage by 50% through new data compression techniques. Built a blockchain proof of concept (Hyperledger) to strengthen security in talent management and resourcing products.

Vassar Labs

Module Lead

October 2016 - September 2017 (1 year)

India

Built an IoT software product analyzing soil and atmospheric conditions to optimize crop-yield management for the State Agricultural Department. Led requirement analysis and development of a secure digital platform for state-run government schools. Delivered projects on time and within budget.

Oracle

Application Developer

March 2014 - April 2016 (2 years 2 months)

Hyderabad Area, India

Developed new Expenses and Payables modules within the Oracle Fusion product. Resolved queries as application support expert for users of Oracle's internal forums.

Verizon Wireless

Software Developer

March 2012 - December 2013 (1 year 10 months)

Team Size Project:30 Module: 2

Environment Software

Languages/Technologies: Java, JSPs, Servlets, SQL, AJAX, jQuery, XML, Webservice.

Application Server : BEA Weblogic .

O/s : Windows XP, Unix

Hardware Intel Pentium IV 800 MHz

Verizon (Telematics & Wireless)

Software Engineer

April 2011 - December 2013 (2 years 9 months)

Developed a standalone web application to configure prepaid pricing plans.

Designed and implemented a web application for optimized trouble-ticket

routing and management. Integrated a map-based location identification system.

Verizon Telematics, Inc.

Software Engineer

April 2011 - February 2012 (11 months)

Team Size Project:30 Module: 2

Environment Software

Languages/Technologies: Java, JSPs, Servlets, SQL, jQuery, XML, Webservice.

Application Server : BEA Weblogic .

O/s : Windows XP, Unix

Hardware Intel Pentium IV 800 MHz

Education

Rajiv Gandhi Prodyogiki Vishwavidyalaya

Bachelor of Engineering (BE), Computer Science · (2006 - 2010)

2004 Senior Secondary School SHH School

· (2004 - 2006)

2006 Higher Secondary School SHH School

· (2004 - 2006)
